

**IMPORTANT NOTICE: Please read in its entirety**

TO: ALL MEMBERS / CUSTOMERS

SUBJECT: Stage One of “Drought Contingency Plan”  
Implemented Voluntary Water Use Restrictions

CRAFT-TURNEY WATER SUPPLY CORPORATION is implementing Stage One of its State approved “Drought Contingency Plan”. The specific cooperation required by all members/customers is set forth on the “Notice of Stage One” implementation notice attached being provided to all water supply system consumers.

Please be advised the referenced Stage One of Craft-Turney Water Supply Corporation’s “Drought Contingency Plan” currently remains in effect to ensure all customers an adequate supply of potable water essential for health, safety, and sanitary purposes. Stage One requires the voluntary restriction of residential, commercial, industrial, and recreational water use by all customers; including, but not limited to, water usage for washing of window/siding, driveways, vehicles, boats and trailers. Additionally, the use of landscape irrigation systems (sprinkler systems) and all other outside lawn/garden watering methods are restricted to two (2) days per calendar week and time of day of watering.

For restrictions to landscape irrigation systems (sprinkler systems) and all other outside lawn/garden watering methods, please review the attached “Notice of Stage One” for the schedule to be followed based on your specific street address.

Craft-Turney Water Supply Corporation respectfully requests your compliance with voluntary water use restrictions as set forth in attached “Notice of Stage One” implementation notice. With your cooperation, Craft-Turney Water Supply Corporation has no desire to implement mandatory restrictions of water use at this time.

Your cooperation is appreciated. Should you have further questions, please do not hesitate to contact the Corporation office at 903-586-9301.

**NOTICE OF STAGE ONE  
DROUGHT CONTINGENCY PLAN**

**CRAFT-TURNEY WATER SUPPLY CORPORATION is hereby notifying its water customers of the implementation of Stage One of its approved Drought Contingency Plan.**

---

Due to the severe drought within the service area, Craft-Turney Water Supply Corporation is implementing Stage One of its Drought Contingency Plan. The customer demand on Craft-Turney WSC’s drinking water system has reached an all time high. This high demand is primarily created by active landscape irrigation systems and outside residential water use, and has created a situation in areas of Craft-Turney WSC’s drinking water system where there is not sufficient pressure to adequately operate landscape irrigation systems and lawn watering methods.

**Stage One** – Stage One is defined as the voluntary restriction of residential and recreational water use including, but not limited to, the outside washing of home windows/siding, driveways, vehicles, boats and trailers. The use of landscape irrigation systems and outside lawn watering methods should be restricted to two (2) days per calendar week.

**Please restrict the use of all landscape irrigation systems and all outside lawn water methods to the following specific assigned days and times:**

| <b>STREET ADDRESS</b>      | <b>HOURS TO WATER</b>   | <b>DAYS TO WATER</b>        |
|----------------------------|---|-----------------------------|
| Even Number Street Address | Between the Hours of Midnight and 10:00 AM <u>AND</u><br>Between the Hours of 8:00 PM to Midnight | Sunday and Thursday Only    |
| Odd Number Street Address  | Between the Hours of Midnight and 10:00 AM <u>AND</u><br>Between the Hours of 8:00 PM to Midnight | Saturday and Wednesday Only |

**Water customers are requested to practice water conservation and to minimize or discontinue water use for non-essential purposes.**

Stage One will remain in effect until you are notified otherwise. Please be aware, if the present drought conditions persist, Stage Two and Stage Three of the State approved Drought Contingency Plan may be implemented.
